

WHO ARE WE?

We're more than a distributor. From initial specification through installation and startup, Kundingler provides **complete service** for all our automation, control, measurement products and engineered solutions.

Kundingler has served the process, control, instrumentation and information technology industries since 1961. Our customers are never limited to just the products on our shelves...it's this ability to be **innovative** that really sets us apart from other companies. **Custom design** solutions can mean the difference between doing something well, and having the **competitive advantage** that comes from doing something exceptionally well.

WHY KUNDINGER

- **In-house** engineers and technicians with domestic and international experience
- **Deep technical expertise** – more than 100+ years combined
- **Global reach** to leading process technologies
- **Commitment** to our customer, our community and our partnerships
- **Proven implementation** processes, with state-of-the art tools and customer driven services
- **Dedicated Account Managers** – with extensive experience

WHAT WE DO

- **The job right the first time**
- **Reduce** risk through proven technical expertise
- **Save** time, money, and resources
- **Build** solutions tailored to support our customers' needs
- **Ensure** your system is running optimally
- **Design** innovative solutions for our customers
- **Eliminate** waste and maximize resources
- **Provide** training on-site, class room style and consulting
